Data Manager

Objective: I am looking for a data management position in pharmaceutical industry, CRO or hospital

SKILLS

Data Management

- Developed databases using SAS : tables, mask writing tools, double data entry system, databases comparison tools, programmed edit-checks (SAS, SQL and macros), queries, data import / export, blind-review, quality control, locked databases, data transfer
- Created writing convention, generated data listings
- Produced Case Report Form (CRF) from a clinical trial protocol
- Generated and presented a Data Management Plan
- Clinical trial methodology, GCP / ICH guidelines

Chemometrics

Optimization of protocol: experimental design, formulation, methods validation
Industrial statistics: data mining (ANOVA), multivariate analysis (PCA, PLS)
Quality control: standards (ISO 9001, ISO 17025, ISO 14001), AQL, audit, project management

Computer skills

Office software: Word, Excel, PowerPoint – **Internet:** daily use, build websites
Database / Data Management: SAS, Access, Capture System, Clintrial
Statistics / Modeling: Statistica, Statgraphics, Minitab, Mathcad, Simca-P, NemrodW, Lumière, Aspen IP21, OSIssoft PI

Languages

French: mother tongue **English:** working knowledge **Spanish:** good writing skills

WORK EXPERIENCE

July 2007
January 2008

LABORATOIRES SCIENCE ET MER – Le Relecq Kerhuon (France) : 7 months
Cosmetic industry – Quality Control

- Tested samples of received products, checked customers and guidelines specifications
- Verified nonconformity, managed corrective and preventive action

2006
May/september

IFREMER – “Centre de Brest” – Plouzané (France) : 5 months
Research institute – Department of biogeochemistry and ecotoxicology

- Produced statistical study design about sanitary control
- Build, managed and analyzed databases including contaminants contents, presented results, modelled and predicted toxicity level

2006
March/april

RHODIA – “Centre de Recherches & Technologies de Lyon” – Saint Fons (France) : 2 months
Chemical industry – Department of statistics & CFD

- Developed procedures and sensitized operators to set up control charts
- Set up and followed control charts in factory, diagnosed anomalies, studied corrective action
- Chairman in meetings with production and factory managers

2005
Jan. / feb.

COOPAGRI BRETAGNE – “Laboratoire central” – Landerneau (France) : 2 months
Food industry – R&D

- Studied, prepared and installed analytical method
- Planned validation steps (calibration, repeatability, robustness, accuracy)

EDUCATION / QUALIFICATIONS

Apr./ jun. 2008

CLIN.DATA (Data Manager professional training) – Clinact Formation – Sèvres (France)

2005 / 2006

Master's degree in chemometrics, quality and industrial statistics – University of Brest (France)

2003 / 2004

Three-year university degree in chemistry – University of Brest (France)

INTERESTS

Football, angling, computer
